# FALLPROTEC SAFEACCESS FOR SUSPENDED WORKS

# MONORAIL FOR HEIGHT SAFETY AND SUSPENDED WORKS

EN1808:2015

ASME/ANSI-A120.1-2014 & IWCA I-14.1

The SafeAccess rail is used in height access systems for façade cleaning and maintenance. It can be installed during the construction or on existing buildings, on façades, ceilings, canopies and rooftops.

# An ultra-resisting height safety rail

The SafeAccess monorail has been tested and certified according to European standards.

- Most efficient system in terms of operational costs specifications
- Bespoke system, fitting your building. Our engineering department accompanies you for setting up the equipment
- Bendable on demand (minimal radius of 600mm)
- Low weight and maximum inertia
- Compatible with any type of architecture with a height between 5 and 250m
- Compatible with rope access technicians, RopeClimber, cradles and travelling ladders

Applications:

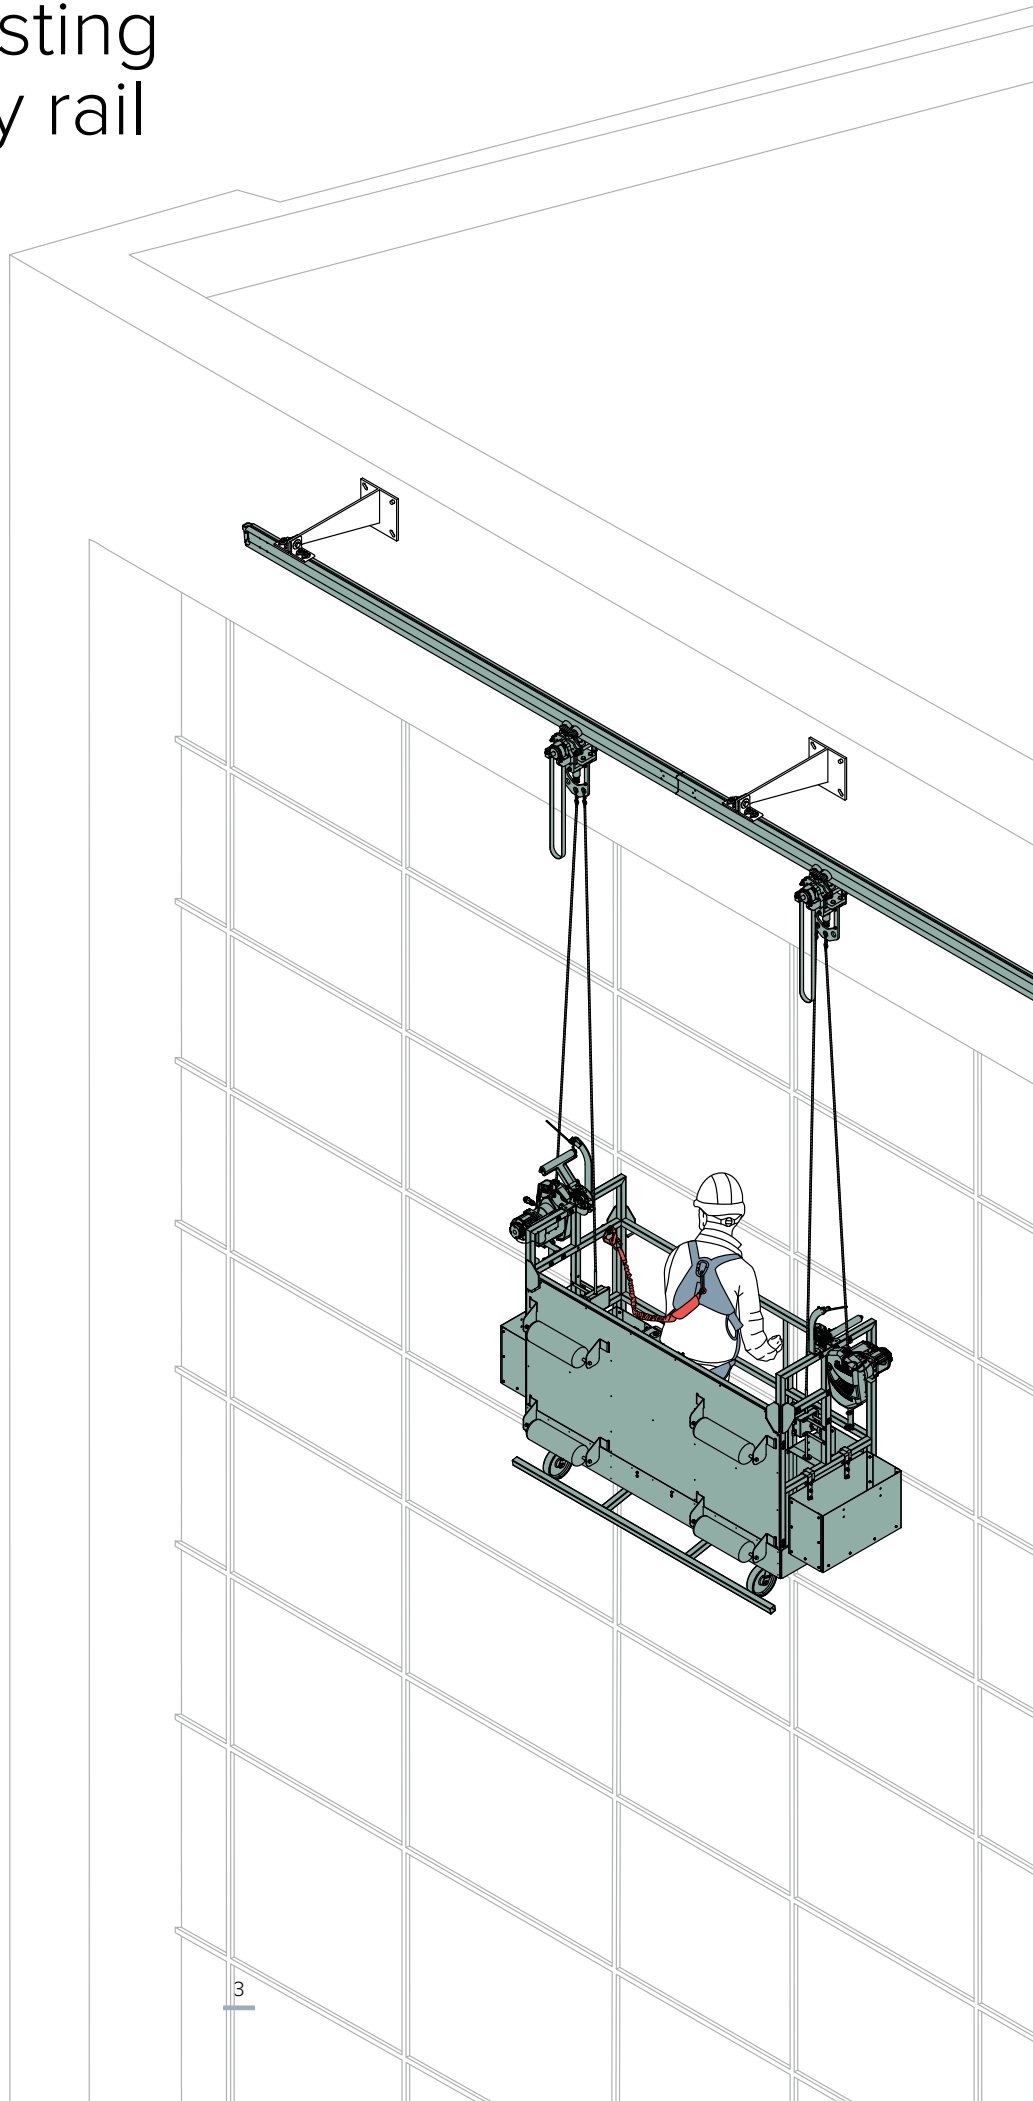

Rope  
Access

Building  
maintenance

Industry

# SafeAccess rail for suspension works

A monorail system is a Building Maintenance Unit made of:

- a bracket connecting the rail to the building
- an aluminium rail
- high strength suspension trolleys
- suspended platform

By mastering all the aspects of the project, the engineering department ensures that the suspended platform reaches the entire facade safely.

## MHS059

- SafeAccess profile weights 5kg / meter.
- Delivered in lengths of 3000 or 6000mm
- Powder-coated in grey RAL7040 resisting seaside or anodized

# SafeAccess brackets

The choice of the bracket depends of several parameters:

- host structure (concrete or steel beam)
- is the bracket fixed to the ceiling, wall or inside of a parapet
- type of suspended equipment
- presence of insulating material or decorative elements.

The engineer's department of Fallprotec creates bespoke designs, calculation notes, implantation drawings etc.

# SafeAccess trolleys

 **NAV7 - Trolley for rope access**

Abseiling trolley equipped with a manual brake, recommended for distances over 100m.

MHS048

 **NAV1 - Trolley for suspension works**

Trolley manually operated by drive belt with rope and pulley

MHS054

 **NAV4 - Trolley for suspension works**

Horizontal motorised trolley, recommended for distances over 100m.

MHS056

 **NAV8 - Trolley for fall arrest**

Trolley for rail fixed to the ridge fitted with an anchor point, recommended for distances over 100m.

MHS049
