

## Vertical SecuRope lifeline and ZIP Fall arrest

Ligne de vie SecuRope verticale et antichute ZIP

Vertikale Securope Seilsicherung und ZIP Fallschutzläufer

Línea de vida Securope vertical y carro anticaídas ZIP

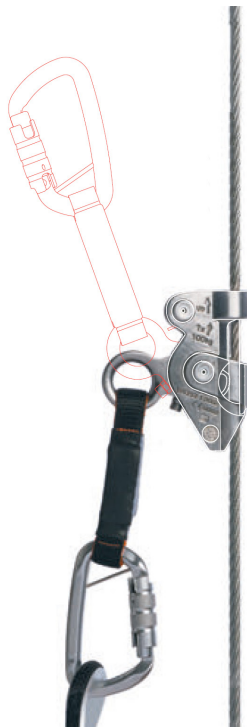

Code N° NSV006 / LDV106 / LDV107 / NSV009 / LDV038

## Description

The SecuRope Vertical EVO lifeline is designed to be permanently installed on ladders where maintenance workers are exposed to a risk of falling. The guided type fall arrester ZIP! locks instantly in case of a fall.

## Advantages

- Cost-efficient solution
- Undeformable
- Freehand system
- Stainless steel elements
- Can be installed on fragile structures such as aluminium ladders

# FALLPROTEC

February 2018

Compliant with EN353-1: 2014 CE  
MADE IN EU

x 1

## Technical specifications

Comes with an installer and user manual

Material: AISI316

## Code N° NSV009

The fallarrest glider ZIP accompanies the progression of the user and passes the anchors smoothly. It blocks automatically in case of a fall while its integrated energy absorber limits the forces transmitted to the user.
