FALLPROTEC

March 2018

Description

The Securope lifeline on Diasafe posts is used on fragile structures such as green roofs. The lifeline is held in place by ballast weight.

Compliant with EN 795:2012
C EN/TS 16415:2013
MADE IN EU

Advantages

- Preserves the roof's isolating properties
- Stainless steel anchor point
- No perforation of roofing membrane
- Possibility of custom made solutions with Fallprotec's engineering department

Technical specifications

Delivered with an installer and user manual.

Material: Steel and fiberglass
