

## Yellow anchor point on cold deck roof

Point d'ancrage jaune sur bac froid  
Punto de anclaje amarillo sobre chapa metálica  
Gelber Anschlagpunkt auf Trapez- und Wellblech

Code N° IDF053 / LDV029

**FALLPROTEC**

October 2017

## Description

Fallprotec conceived fixation assemblies for fragile structures such as cold deck steel roofs with a thickness > 0,5mm. This assembly can be combined with the LDV029 high visibility Eye anchor for works at height or for the installation of a temporary lifeline.

## Advantages

- High visibility anchor point
- Rotative system accompanying the movements of the user
- Suitable for works in a specific zone or for installing a temporary lifeline
- Fixation with a self-drilling screw eliminating any risk of infiltration

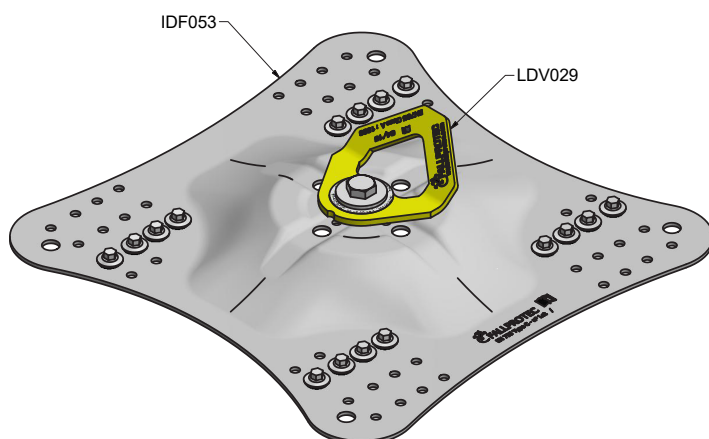

## Technical specifications

Material: stainless steel AISI304 & metallized steel

Compliant with EN795: 2012  
Type A  
CEN/TS16415:2013  
MADE IN EU
