

## Ultra robust blocks important lengths

Bloc ultra compact grnades longueurs  
Anticaídas retráctiles largos  
Ultra-lange Hörsicherheitsgeräte

Code N° IH

# FALLPROTEC

September 2018

## Description

The IH range is specially designed for industrial applications where the retractable is installed at 30 meter height or more. The fall arrest block is made of a drum around which a cable is wound. The cable pulls on a spring always in tension when in use, so that the block accompanies the movements of the user, even at a long distance from it. In case of a fall, the mechanism locks within 50cm.

## Advantages

- Easy use
- Stops fall within the first centimeters
- Absorbs the energy applied on the body
- Wide range of available fallarresters to match every configuration
- Highly resistant and durable

Compliant with EN360:2002  
MADE IN EU

x 1

## Technical specifications

Delivered with an user manual  
Material : Aluminium carter /  
Galvanized steel cable
