

# Securope Vertical Quickset

**FALLPROTEC**

December 2019

## Description

The Securope Vertical Quickset is a lifeline conceived for windmills, pylones, masts and industrial applications.

Easily used and adapted to all ladder types, this flexible system is set up with stainless steel cables. Its opening glider can be inserted or removed at any point of the system with a twin safety mechanism.

## Advantages

- Two options : absorber integrated in the glider or on top of the lifeline
- Easy mounting
- Swagless system, no special tool needed
- Overpassing anchors
- No deformation of the intermediate anchors
- Cable vibration absorption system

Compliant with EN353-1:2018  
MADE IN EU
