December 2017

## Description

The double elastic lanyard is a personal protection equipment for people working at height.

## Advantages

- The elastic strands accompany the movements of the user
- The double lanyard allows the passing of obstacles while remaining connected at all times

## Technical specifications

Delivered with an installation manual

Material: 100% polyamide

Compliant with EN 355:2002  
EN 354:1992  
MADE IN EU
